

## Soal no 2

```
CREATE TABLE children (
  id INT PRIMARY KEY,
  name VARCHAR(255) NOT NULL,
  parent_id INT
);

INSERT INTO children (id, name, parent_id) VALUES
(1, 'Zaki', 2),
(2, 'Ilham', NULL),
(3, 'Irwan', 2),
(4, 'Arka', 3);

select c.id, c.name , p.name as parent_name from children c left join children p on p.id = c.parent_id
```

Query : **SELECT** c.id, c.name, p.name **AS** parent\_name **FROM** children c **LEFT JOIN** children p **on** p.id = c.parent\_id

Enter a SQL expression

	id	name	parent name
1	1	Zaki	Ilham
2	2	Ilham	[NULL]
3	3	Irwan	Ilham
4	4	Arka	Irwan
